

Year One

Beech and Oak

17th October 2014

Sound of the Week Books
Well done to everyone who is enjoying the phonics activities! We are amazed about how busy some of you are at the weekends, writing and doing lots of activities.

Maths Focus

This week we have been problem solving! We have used our adding and taking away skills to solve maths word problems. We remembered to look for the numbers in the word problem and thought about what to do with those numbers and helped our working out by drawing simple pictures.

At home can you solve this problem?
There are 10 fish in a pond, suddenly 3 frogs jump in to play. How many animals are there in the pond now?
When you have worked that out, can you work out how many fish are left in the pond if a Heron swoops down and eats 3 of them? Will you use the + or - symbols ,,, or both?

Dear Parents,

We had a brilliant trip to Wisley on Tuesday and despite the rather soggy conditions, managed to learn all about how autumn changes everything around us. The children were beautifully behaved and have written some fantastic sentences about the trip!

We enjoyed having Reception children to visit yesterday and Year One were very kind to them, showing off their work very proudly.

Emily and Sheena :)
