

# Year One

## Beech and Oak

22nd November 2013

It was great to see most of you at Parent Consultations this week. Please remember we will always make time to chat about anything.

### Sound of the Week

Lots of children are having a go at their sound of the week activities and are making super progress in phonics.

### Dear Parents,

We had a wonderful science week this week. We met a new friend called Old Bear who sent us a video asking us to help him. We had to learn all about materials and their properties so we could help him build a house and make an umbrella.

It was fun investigating which materials were waterproof! We enjoyed our House Football skills this week in P.E. and also had a go at some rolls in gym including a teddy bear roll! We ended the week with a very exciting House Fluffy morning on Friday.

Emily and Hannah :)

### Maths Focus

This week we were learning about measuring and time. We were using comparative language to describe different famous bears, e.g. my brother is taller than me but Daddy is the tallest. We were ordering days of the week and had a go at reading o'clock too.

**What time do you do things and in what order a home? Do you brush your teeth first? What do you do at 7:00 on a Monday? Draw some pictures of the things you do.**
